Profile

Motivated and adaptable software engineering graduate seeking a fresher role or internship to apply technical expertise in full-stack development, mobile app design, and cloud technologies while contributing to innovative projects.

SKILLS

- Java, Python, C#, JavaScript, Flutter, React, Node.js, MERN Stack, Django, HTML, CSS
- MySQL, Oracle, MongoDB, Azure, DevOps, SDLC, DSA, Networking
- Git/GitHub, Agile Development, Operating Systems

WORK EXPERIENCE

NexGen: *Jr Full Stack Developer*

07/2023 – 12/2023

- Designed and developed 3 client-facing projects, including an e-commerce platform and an office management website, leveraging the MERN stack to deliver scalable and user-friendly solutions.
- Identified and resolved over 50+ bugs across various projects, enhancing system stability and improving user experience for 1,000+ monthly active users.
- Optimized website performance, reducing load times by 30% and increasing visitor retention by 15%. Maintained and improved the company's existing platform, collaborating with a team of 5 to address technical issues and implement new features.

TechnoByte: *Mobile App Developer Intern*

12/2021 – 03/2022

- Designed and implemented a Hospital Management System app that streamlined patient and resource management for a 200+ bed hospital.
- Developed a Beverage Company app, optimizing inventory and order management processes, resulting in a 20% improvement in delivery timelines.
- Fixed critical bugs during app testing, improving app stability by 25% and ensuring a seamless user experience.
- Actively contributed to database design, improving query efficiency by 30%, and participated in planning sessions to ensure seamless collaboration with cross-functional teams.

Leapfrog: *Student Partner Program*

01/2022 – 12/2022

- Gained hands-on experience with the MERN stack.
- Participated in two hackathons, delivering solutions that improved efficiency in app-based workflows by 10-15%.
- Conducted and participated in 10+ IT seminars and webinars, mentoring 100+ peers on modern tech stacks and industry-relevant practices.
- Debugged and enhanced projects created during the program, reducing defect rates by 20%.
- Collaborated with diverse teams, contributing to knowledge-sharing sessions attended by over 150 participants.

EDUCATION

Lambton College

Jan 2024 – Aug 2025

Full Stack Software Development / Certificate

Relevant Coursework: MERN Stack Development, Programming, Database, Cloud Computing, DevOps

Anish Basnet

London Metropolitan University

Jan 2019 – May 2022

B.Sc. in Computing

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Programming, Artificial Intelligence, Mobile App Development, Software Engineering, User Experience/User Interfaces, Object-Oriented Programming, Networking, Hands-on Projects, Linux

PERSONAL PROJECTS

FriendsInSky (Full Stack Chat App)

- Developed a chat application using the MERN stack, featuring responsive UI built with React and Tailwind CSS.
- Implemented WebSocket for real-time communication and optimized user interaction with polished front-end design.

Trekking Guide App (Full Stack App)

- Developed a cross-platform mobile app with Flutter and Django, featuring location-based services for trekking routes.

Memory Game (React)

- Created an interactive memory game using React, enhancing user experience with animations and responsive design

CERTIFICATIONS

- Responsive Web Design – FreeCodeCamp
- Developing Front-End Apps with React – IBM (Coursera)
- Introduction to Cloud Computing – IBM (Coursera)
